

Lou -initial build notes, notes for final microsites

Creative Directing for Max:

- We talked about how the different websites on the desktop site were gonna stack for the mobile site
- Talked about background - gradient vs. white I think both would work and left it up to max
-
- Max is adding a carousel-like interactive feature to character cards
- also talked about adding a simple top nav bar since there is alot of content on the website now for just scrolling

Designing for Michelle:

- Add bio section to home page
- Talked about letting/spacing in grid for discography and fil works, also that each work would navigate to a video/music link for the song
- Change the favicon in head because brushstroke is too small and hard to see -will probably change to a simple piano keys icon
